DETAILED ACTION

Claim Rejections - 35 USC § 102/103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 6-9, 14-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Roebersen et al. (Roebersen), U.S. Patent 2,805,196.

The Roebersen patent discloses the claimed homogenous cation exchange membrane comprising a polyvinyl alcohol having a sulfonic group (see col. 2, lines 9-68). The reference further teaches the crosslinking by formaldehyde (see example VI to produce membranes having similar properties claimed).

The method used to produce the claimed membrane may differ somewhat. However, it has been well settled that the invention defined in a product-by-process claim is a product, not a process. In re Bridgeford, 149 U.S.P.Q. 55 C.C.P.A. (1966). It is the patentability of the product claimed and NOT of the recited process steps which must be established. In re Brown, 173 U.S.P.Q. 685 C.C.P.A. (1972); In re Wertheim, 191 U.S.P.Q. 90 C.C.P.A. (1976).

The patent further discloses the method of electrodialysis using the formed membrane to treat solutions similar to those claimed (see col. 7, lines 3-41).

Allowable Subject Matter

Claims 2, 4-5 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-13 are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record fairly discloses the claimed sulfonic group attached to the polyvinyl alcohol to form the cation exchange membrane.
